Description

Name:

Checking the number of questions in selected options when starting the exam.

Preconditions:

Running application.

Steps:

1. Pressing the "Exam" button

2. Selecting the number of questions from the drop-down list - 10, 20, 30, 40, 60

3. Pressing the "Start Exam" button

4. Answer the selected number of questions.

Expected result:

Inactive button responsible for moving to the next question after showing the last question from the selected option in the drop-down list.

Comment:

Correct number of questions for options 10, 20, 30 and 40 from the drop-down list. Missing option 60, which has the <href_quest_ammount_5> option instead, which prevents the test from starting.
