Description

**Name:** Incomplete functionality of the "exam" button

**Steps:**

1. Pressing the "Exam" button.

**Expected result:** The appearance of an exam tab with a list of exam names on the left and a drop-down list with the number of questions with values (10, 20, 30, 40, 60), where the default value is 10. On the right there is a "Start exam" button

**Current result:** No value 60 in the dropdown list. There is an option to select <href\_quest\_ammount\_5>. Default value set to 20.

**Environment:**

- system type: 64-bit operating system , x64 processor
- version: Windows 10 Home

**Priority:** Low - The application allows you to start the exam, but all available options are missing.

**Repeatability:** The error appears every time the application is launched.
