Description

Name: One of the options in the drop-down list regarding the number of questions is missing.

Steps:

1. Pressing the "Exam" button

2. Selecting the number of questions from the drop-down list - 10, 20, 30, 40, 60

3. Pressing the "Start Exam" button

4. Answer the selected number of questions.

Expected result: The appropriate number of declared questions in the drop-down bar and the inactive button responsible for moving to the next question after showing the last question from the selected option in the drop-down list.

Current result: Correct number of questions for options 10, 20, 30 and 40 from the drop-down list. Missing option 60, which has the <href_quest_ammount_5> option instead, which prevents the test from starting.

Environment:

• system type: 64-bit operating system, x64 processor

• version: Windows 10 Home

Priority: Low - Missing one of the options that does not have a major impact on the functionality of the application.

Repeatability: The error appears every time the application is launched.
