Description

Name: Inconsistency in the location and functionality of the "Next" button

Steps:

1. Pressing the "Exam" button
2. Selecting the number of questions from the drop-down list.
3. Pressing the "Start Exam" button
4. Select the answer.
5. Press the "Next" button.

Expected result: Selection of the next question. For the last question, the "Next" button is disabled.

Current result: The "Next" button is on the left where the "Undo" button should be and is disabled on the first question.

Environment:

• system type: 64-bit operating system, x64 processor

• version: Windows 10 Home

Priority: Medium - it is possible to perform the test, but you need to find the right button.

Repeatability: The error appears every time the application is launched.
